The octopus

An octopus has eight arms, three hearts and blue blood. It has no bones at all, so it can squeeze through a gap not much bigger than its eye. Each arm can taste what it touches.

Draw an octopus squeezing into a bottle.

ink!

When an octopus is frightened it squirts a cloud of dark ink and shoots away backwards. It can also change colour in less than a second to match the rocks and sand around it.

Draw an octopus hiding. Can anyone find it?

The octopus: what do you remember?

Tick one box for each question.

1. How many hearts does an octopus have?

- [ ] One
- [ ] Three
- [ ] Eight

2. Why can it squeeze through tiny gaps?

- [ ] It has no bones
- [ ] It is very thin
- [ ] It has blue blood

3. What does it do when it is frightened?

- [ ] It sings
- [ ] It digs a hole
- [ ] It squirts ink

One more thing I want to know:

HOW MANY STARS? TICK A NUMBER ☆ 1 2 3 4 5

Write back to me!

What did you like? What should I bring next? Ask for something new, or just draw me a picture.

☐ Bring me more like this

Dear Niby,

Your grown-up sees your letter too, so they can help me find it.
